

CONTENTS

Implementation and Simulation of Sequential Adverse Condition Scenarios for Autonomous Driving

by Young-Jin Park, Hui-Sup Cho and Sanghun Yun

TIMeFoRCE: An Identity and Access Management Framework for IoT Devices in A Zero Trust Architecture

by Vinton Morris, Kevin Kornegay, Joy Falaye, Sean Richardson, Marcial Tienteu and Loic Jephson Djomo Tchuenkou

Private 5G MIMO for Cable TV IP Broadcasting

by Hiroshi Ito, Hideki Ohno, Hikaru Kitano and Shuichi Matsumoto

Detection Method and Mitigation of Server-Spoofing Attacks on SOME/IP at the Service Discovery Phase

by Kazuki Iehira and Hiroyuki Inooue

StradNet: Automated Structural Adaptation for Efficient Deep Neural Network Design

by David Degbor, Haiping Xu, Pratiksha Singh, Shannon Gibbs and Donghui Yan

Identifying Comprehension Faults Through Word Embedding and Multimodal Analysis

by Kento Yasuda, Hiromitsu Shimakawa and Fumiko Harada

Efficient Pattern Recognition Resource Utilization Neural Network

by Hanan Hassan Ali Adlan and Elsadig Ahmed Mohamed Babiker

Optimization of Sheet Material Layout in Industrial Production Using Genetic Algorithms

by Chiang Ling Feng

System-Level Test Case Design for Field Reliability Alignment in Complex Products

by Robinson Lawrance and Nishith Kumar Reddy Gorla

Federated Learning with Differential Privacy and Blockchain for Security and Privacy in IoMT A Theoretical Comparison and Review

by Shaista Ashraf Farooqi, Aedah Abd Rahman and Amna Saad

PerfVis+: From Timestamps to Insight through Integration of Visual and Statistical Analysis

by Marlene Böhmer and Thorsten Herfet

A Multi-class Acoustic Dataset and Interactive Tool for Analyzing Drone Signatures in Real-World Environments

by Mia Yaqin Wang, Mackenzie Linn, Andrew Patrick Berg and Qian Zhang
